

# Your Woodhouse Careers Learning Journey

## Careers in PSHE

As part of your PSHE lessons, you will discuss prioritising spending and your personal strengths that can help you in the future. You will also build on your year 5 learning by looking at some more different ways that we can contribute to the community.

You will have a talk from a parent of someone in the school during Y5 who will tell you all about their job and what they do in their daily lives.

## Careers in PSHE

As part of your PSHE lessons in Y5 you start by looking at money skills, stereotypes in the workplace, and how we can contribute to our community through activities such as volunteering.

## Employability Skills

In KS2, we focus on building your employability skills and encouraging you to identify where you have learnt about these and how you show these skills regularly.

Year  
5

Year  
6

## Employability Skills

In year 6, we continue to build on and develop those skills that we have identified as being really important in the workplace.

## Careers in PSHE

In year 7 PSHE, you will continue to look at your personal strengths and how we deal with setbacks and failures. We also build on your knowledge of stereotypes and gender roles in the workplaces, along with looking at career decisions and moral dilemmas around money.

Year  
7

During National Careers Week each year, there will be lots of different activities in school that will help you learn about different careers and you can even earn some house points!

## Careers in PSHE

In year 8 your careers focus in PSHE is on setting targets and goals ready for your move up to the high school, alongside learning about jobs and wages and money risks.

Year  
8

goodbye.

## Employability Skills

In KS3, we start to help you apply your employability skills to real life situations and activities.

It is all about putting what you have learnt into practice!

## Employability Skills

We carry on talking about your employability skills in year 8 and give you loads of opportunities to practice them such as in our Dragon's Den day.

## Dragon's Den Experience

You will spend a day creating and designing a new product that you will have to market, cost, and pitch to our Dragons.

You will use all of your employability skills that you have been learning about on this day.

When you reach year 9, you will continue to develop your employability skills and have more opportunities to engage with employers and training providers.

We will begin to build on skills that you will have already started to develop at your first schools.
