'Be the Best' Programming Challenge **Answers**
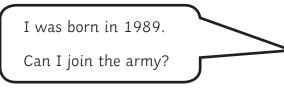

To join the British Army, you have to be 16 years or older, but no older than 32 years old.

> I was born in 1989.
>
> Can I join the army?

Using your knowledge of **selection, comparative operators** and **Boolean operators**, write a Python program that will do the following:

1. Ask the user to enter their age.
2. Output whether or not they are eligible to join the British Army.

When you have finished:

Test your program several times to make sure that it works.

Then test someone else's program.

Write your completed code in the box below (the first few lines have been done for you):

```python
# Be The Best

age = int(input("Please enter your age:"))

if age >= 16 and age <= 32:

    print("Yes, you can join the Army.")

else:

    print("Sorry, you can't join the Army.")
```
